

VIKING SEATECH

ENVIRONMENTAL POLICY

Viking SeaTech conducts all our business activities in a manner which complies with the laws and regulations of the countries in which we operate and to internationally recognised standards.

Viking SeaTech provides appropriate resources and actively engages the participation of our workforce, employees, sub-contractors and clients in safeguarding the environment in which our business activities occur.

Specifically Viking SeaTech will strive to:

- Document roles and responsibilities at all levels of the organisation and provide the necessary resources and training required for effective delivery of this Policy.
- Prevent waste and inefficient uses of resources wherever possible through the adoption of the recognised hierarchy of prevent, reduce, recover, re-use and re-cycle.
- Minimise the impact that transport has on the environment through the support of more sustainable modes of travel and reduce the need for travel where feasible.
- Promote energy efficiency throughout our operations.
- Reduce all harmful emissions to the atmosphere and marine environment.
- Procure materials and services within a framework that encourages environmental sustainability.
- Minimise potential nuisances such as noise, dust, litter, odour, light pollution and visual impact.
- Protect biodiversity through the effective management of our sites and operations within the countries that we operate.
- Engage with subcontract companies, who endeavour to promote good environmental practice and management consistent with our own approach.
- Identify foreseeable emergencies and their consequences and prepare, test and review emergency response plans.
- Achieve continual improvement through a cycle of audit and review.

This Policy statement is available to all interested parties.
